

Less Cost... ...Better Power

Energy Savings • Electrical Efficiencies • Harmonics Correction • Visual Enhancements • Power Quality • Environmental Benefits

Are you concerned about rising energy and electricity costs?

Do you want to improve your company's electrical efficiency as well as reduce its environmental impact in a cost-effective way?

AMGP can **save you up to 30%** with our **risk-free** electricity cost reduction program that is guaranteed in writing through Lloyds of London.

What We Do

- Develop turnkey projects for our clients by installing energy conservation equipment that minimizes out-of-pocket cost and maximizes return from cash flow.
- Hold initial interview to evaluate client needs
- Conduct an extensive site survey and engineering study
- Present study, identify potential savings, and propose customized Energy Automation program
- Implementation of electricity cost-reduction program upon agreement with client

Our Energy Automation Advantages

- Lighting Correction/Visual Enhancement
- Line Loss and Voltage Drop Correction
- Improves Voltage and Increases Distribution Capacity
- Eliminate Peak Demand Penalties
- **ROI of 20%-50%**
- **Payback as low as 24 months**
- **Does not require changes** to operation or training
- **No out-of-pocket expense**
- Cleaner power **reduces maintenance costs**
- Backed by the **technical expertise of a 30-year-old company** that employs EE level technicians as well as OSHA certified individuals

What Our Customers Say

"Not only were we able to purchase this program with a **reasonable return on investment of less than three years**, but we are able to curve some of the ongoing maintenance costs. I feel this program has **shown results that are better than expected**, and thus I am having AMGP Inc. start the same program at our other dealership."

— Scott Robinson, Controller, STAR Chevrolet-Nissan-Volvo

"The installation is going very well. **I'm very happy with the results** (big difference on visibility) and your installers are great. They are moving along very well and not interfering with our operation."

— Peter Dewill, President, Chelsea Building Products

Why make your electric company your favorite charity?
